

Item Name : Receiver Adapters Bend with Vacuum Connection

Item Code : 023.2008.01

Item Description :

Receiver Adapters Bend with Vacuum Connection – Precision L

Receiver Adapters Bend with Vacuum Connection are specialized **scientific glassware accessories** designed for **controlled fluid transfer and regulation** in laboratory workflows.

Key Features

- **High-Quality Borosilicate Glass** – Provides **thermal stability, durability, and chemical resistance**.
- **Bent Design with Vacuum Port** – Facilitates **fluid flow while maintaining vacuum control**.
- **Leak-Proof & Contamination Resistant** – Ensures **sample integrity and prevents unwanted airflow**.
- **Standardized Joint Compatibility** – Available in **multiple socket and cone sizes**, adaptable to various laboratory equipment.

Why Choose Our Receiver Adapters Bend with Vacuum Connection?

Designed for **scientific precision**, these adapters enable **secure vacuum-assisted fluid transfers, pressure stabilization, and contamination control**.

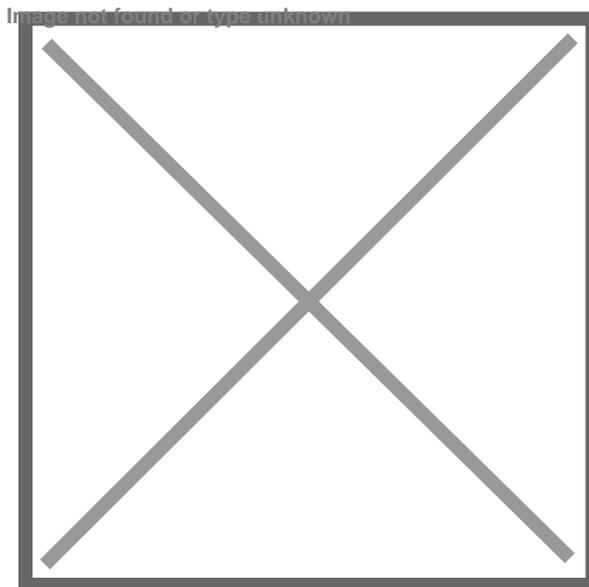

Applications

- **Chemical Research & Analytical Labs** – Supports **controlled fluid flow and vacuum operations in experiments**.
- **Biotech & Pharmaceutical Laboratories** – Ensures **airtight vacuum-assisted sample transitions**.
- **Industrial & Scientific Fluid Processing** – Ideal for **vacuum-sealed laboratory setups in analytical environments**.

Upgrade Your Laboratory Efficiency Today

Enhance your **scientific experiments** with high-performance **Receiver Adapters Bend with Vacuum Connection**. Designed for **precision and efficiency**.
