

Item Name : Simple Glands with cap Thermometer Adapter

Item Code : 055.2008.01

Item Description :

Simple Glands with Cap Thermometer Adapter – Laboratory Glassware for Secure Temperature Monitoring

Simple Glands with Cap Thermometer Adapter is a precision-engineered laboratory component designed for accurate temperature measurement in scientific experiments. Manufactured from high-quality borosilicate glass, this adapter ensures optimal performance in controlled environments.

Key Features

- **Premium Borosilicate Glass** – Provides superior thermal stability and chemical resistance.
- **Secure Gland & Cap Design** – Facilitates precise thermometer placement while preventing contamination.
- **Leak-Proof & Contamination Resistant** – Ensures sample integrity during laboratory procedures.
- **Standardized Joint Compatibility** – Available in multiple cone sizes to fit laboratory setups.

Why Choose Our Simple Glands with Cap Thermometer Adapter?

Designed for laboratory precision, this adapter enhances temperature measurement accuracy while preventing unwanted fluctuations. Its secure gland and cap configuration optimizes thermometer placement for streamlined chemical, pharmaceutical, and industrial applications.

Applications

- **Chemical & Pharmaceutical Research** – Supports controlled temperature monitoring in experimental setups.
- **Biotech & Medical Laboratories** – Ensures efficient sample containment for analytical procedures.
- **Industrial & Scientific Glassware Integration** – Facilitates temperature control in manufacturing and testing environments.

Optional Variants

All kinds of adapters can also be provided with plastic hose connectors instead of glass hose connectors. Please see the photo.

Ordering Information

For ordering these adapters, please ask for prices separately and mark the product as HC.
