

**Item Name :** Filter Paper With Different Sizes

**Item Code :** 2063.2008.01

**Item Description :**

- 5.5cm Diameter, Pore Size: 20-25µm
- Grade 4 Qualitative Filter Paper
- Used in qualitative analytical techniques to determine and identify materials
- Extremely fast filtering; provides excellent retention of coarse particles (20-25µm) and gelatinous precipitates such as ferric hydroxide and aluminum hydroxide
- Used when high flow rates in air pollution monitoring are required and the collection of fine particles is not critical
- Available in different sizes
