

**Item Name :** Heart with thymus

**Item Code :** 4186.2008.01

**Item Description :**

This three-part natural size model shows the anatomy of the human heart associated with the thymus gland. The thymus and the anterior heart wall can be removed for closer examination of the inner heart structures such as the left and right atria and ventricles, valves and papillary muscles. Mounted on stand.
