

Item Name : Multiple Adapters Two Necks

Item Code : 016.2008.01

Item Description :

Multiple Adapters Two Necks – Laboratory Glassware for Multi-Step Reactions

Multiple Adapters Two Necks are high-precision laboratory connectors designed for complex experimental setups. Manufactured from durable borosilicate glass, they ensure reliable performance in various laboratory environments.

Key Features

- **Premium Borosilicate Glass** – Offers excellent thermal stability and chemical durability.
- **Dual Neck Configuration** – Allows simultaneous connections for multi-step reactions.
- **Leak-Proof and Contamination Resistant** – Maintains sample integrity throughout experiments.
- **Standardized Joint Compatibility** – Available in multiple socket and cone sizes.

Why Choose Our Multiple Adapters Two Necks?

Engineered for laboratory efficiency, these adapters enable researchers to conduct controlled fluid mixing and chemical reactions with precision and ease.

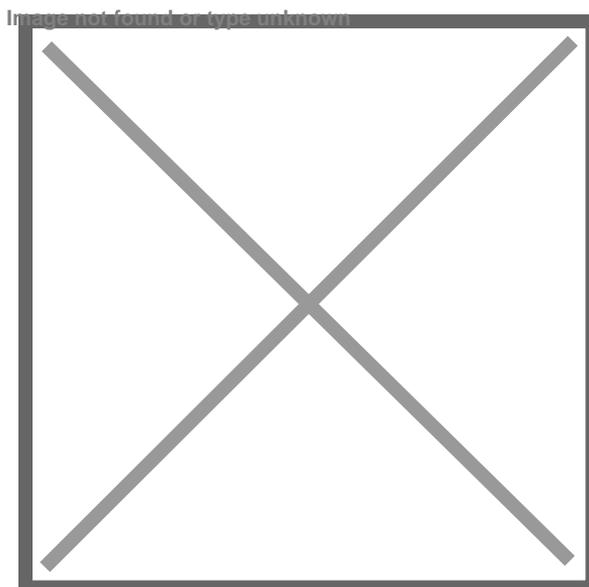

Applications

- **Chemical Analysis and Organic Synthesis** – Enables precise multi-step reactions.
- **Biotech and Pharmaceutical Laboratories** – Supports efficient sample preparation and fluid transfer.
- **Industrial Processing Units** – Ideal for manufacturing and controlled laboratory experiments.

Optimize Your Laboratory Setup Today

Improve scientific accuracy with high-performance Multiple Adapters Two Necks. Designed for seamless connections, leak-proof transitions, and easy handling, they are the essential component for your laboratory's success.
