

Item Name : Multiple Adapters Three Necks

Item Code : 017.2008.01

Item Description :

Multiple Adapters Three Necks – Laboratory Glassware for Multi

Multiple Adapters Three Necks are high-quality laboratory connectors designed for seamless integration into experimental setups. Made from

Key Features

- **Premium Borosilicate Glass** – Provides excellent thermal stability and chemical durability.
- **Triple Neck Configuration** – Enables simultaneous connections for complex multi-step experiments.
- **Leak-Proof and Contamination Resistant** – Ensures sample integrity throughout research processes.
- **Standardized Joint Compatibility** – Available in multiple socket and cone sizes to fit various laboratory setups.

Why Choose Our Multiple Adapters Three Necks?

Engineered for laboratory precision, these adapters facilitate controlled fluid mixing and multi-channel processing. Their three-neck design

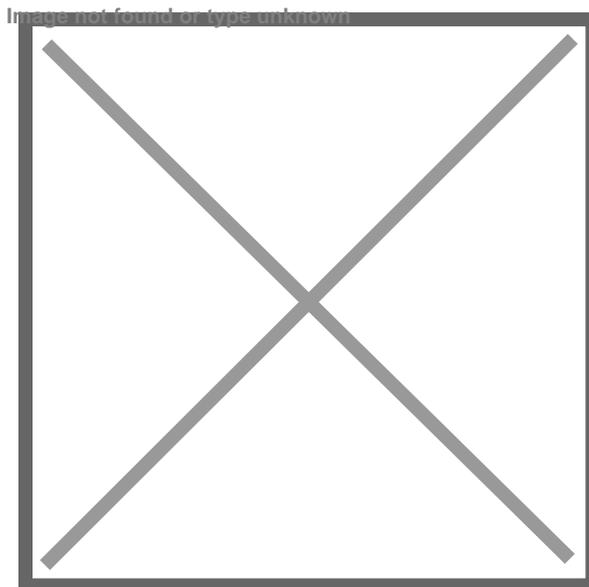

Applications

- **Chemical Research & Organic Synthesis** – Enables multi-step reactions for advanced experimental workflows.
- **Biotech & Pharmaceutical Laboratories** – Supports efficient sample preparation and fluid transitions.
- **Industrial and Analytical Processes** – Ideal for manufacturing operations and controlled laboratory experiments.

Optimize Your Laboratory Setup Today

Enhance scientific precision with high-performance Multiple Adapters Three Necks. Designed for seamless connections, leak-proof transi
