

Item Name : Receiver Adapters Bend with Vent.

Item Code : 021.2008.01

Item Description :

Receiver Adapters Bend with Vent – High-Precision Laboratory

Receiver Adapters Bend with Vent are specialized **scientific glassware accessories** designed for efficient **fluid transfer** and **controlled experiments**.

Key Features

- **High-Quality Borosilicate Glass** – Provides superior durability, thermal stability, and chemical resistance.
- **Precision Bent Design** – Facilitates smooth fluid transitions while maintaining structural integrity.
- **Integrated Vent System** – Enhances controlled airflow for pressure regulation in experimental setups.
- **Leak-Proof & Contamination Resistant** – Prevents sample evaporation, ensuring laboratory purity.
- **Standardized Joint Compatibility** – Available in multiple **socket and cone sizes**, making it adaptable to diverse laboratory applications.

Why Choose Our Receiver Adapters Bend with Vent?

Engineered for laboratory efficiency, these adapters enable precise **fluid transfer**, **pressure stabilization**, and **sample containment** and industrial testing.

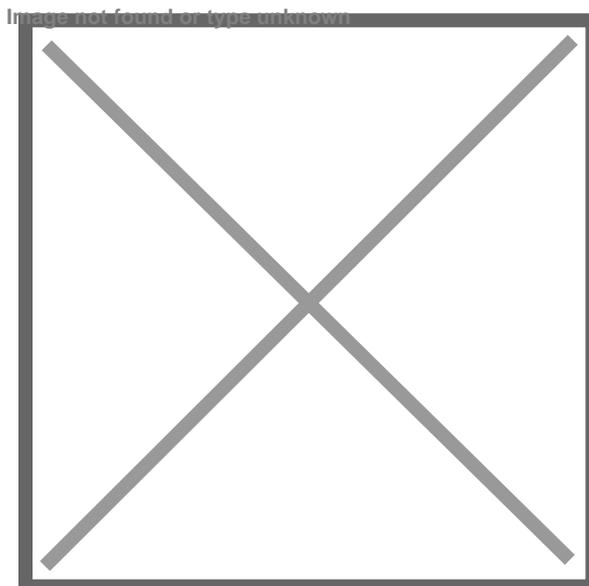

Applications

- **Chemical & Pharmaceutical Research** – Enables **accurate fluid handling** and pressure regulation in experiments.
- **Biotech & Medical Laboratories** – Supports **sample preparation and controlled liquid flow**.
- **Industrial Fluid Processing** – Ideal for **scientific glassware applications in analytical environments**.

Upgrade Your Laboratory Setup Today

Enhance your **laboratory workflow** with high-performance **Receiver Adapters Bend with Vent**. Designed for **airtight sealing**, **precision**
