

Item Name : Receiver Adapters Multiple Connection

Item Code : 024.2008.01

Item Description :

Receiver Adapters Multiple Connection – Precision Glassware for

Receiver Adapters Multiple Connection are essential laboratory connectors designed for efficient fluid transfer and multi-step scientific processes and workflows.

Key Features

- **Premium Borosilicate Glass** – Provides durability, thermal stability, and high resistance to chemicals.
- **Multiple Connection Points** – Supports simultaneous fluid transfers for advanced laboratory experiments.
- **Leak-Proof and Contamination Resistant** – Maintains sample integrity while preventing unwanted evaporation.
- **Standardized Joint Compatibility** – Available in various socket and cone sizes, adaptable for diverse laboratory setups.

Why Choose Our Receiver Adapters Multiple Connection?

Designed for scientific precision, these adapters facilitate multi-step reactions, controlled fluid handling, and parallel sample processing. Ideal for high-throughput laboratories.

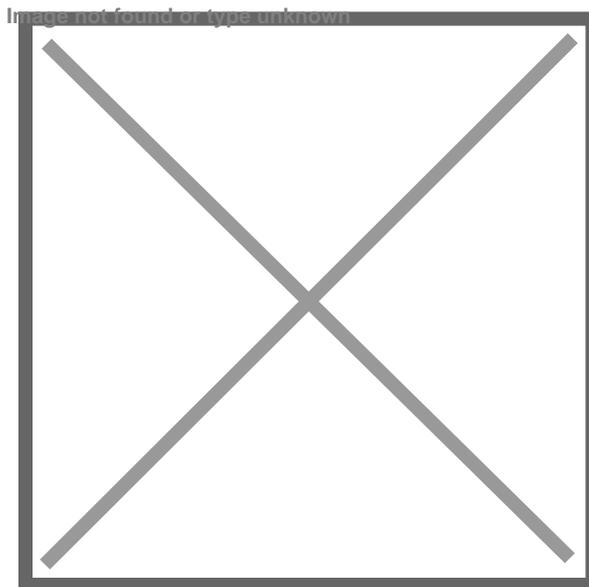

Applications

- **Chemical Research & Pharmaceutical Labs** – Enables multi-channel fluid transfer and controlled experimental workflows.
- **Biotech & Medical Laboratories** – Supports sample preparation and simultaneous fluid distribution.
- **Industrial Fluid Processing Units** – Ideal for scientific glassware applications in analytical laboratories.

Upgrade Your Laboratory Efficiency Today

Improve scientific accuracy with Receiver Adapters Multiple Connection, designed for seamless connectivity, leak-proof fluid transfers, and efficient workflow management.
