

Item Name : Receiver Adapters Plain Bend

Item Code : 025.2008.00

Item Description :

Receiver Adapters Plain Bend – High-Precision Laboratory Glass

Receiver Adapters Plain Bend are essential laboratory connectors designed for seamless fluid transfer in scientific experiments. Manufactured from high-quality borosilicate glass, they ensure precise and leak-free connections.

Key Features

- **Premium Borosilicate Glass** – Offers high thermal stability and chemical resistance.
- **Precision Bent Design** – Facilitates controlled fluid flow while maintaining structural integrity.
- **Leak-Proof & Contamination Resistant** – Prevents sample evaporation and maintains purity.
- **Standardized Joint Compatibility** – Available in multiple socket and cone sizes for laboratory setups.

Why Choose Our Receiver Adapters Plain Bend?

Designed for laboratory efficiency, these adapters allow precise fluid transfer and ensure contamination-free sample containment. Ideal for use in a wide range of scientific and industrial applications.

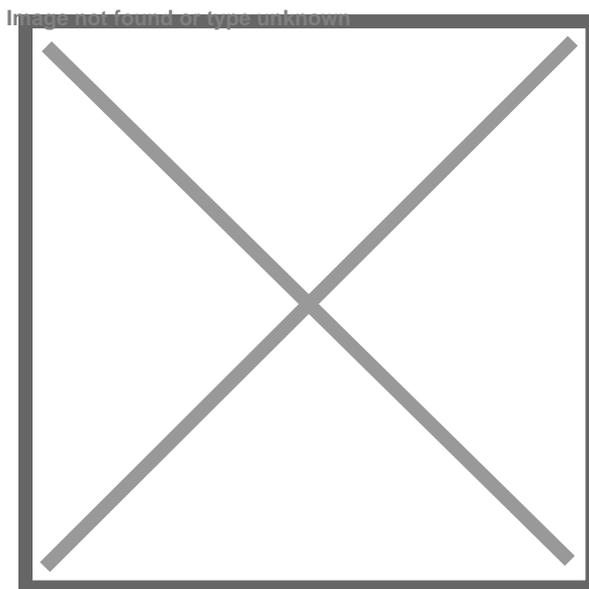

Applications

- **Chemical & Pharmaceutical Research** – Supports controlled fluid distribution and sample handling.
- **Biotech & Medical Laboratories** – Ensures airtight fluid transitions for sample purity.
- **Industrial Fluid Processing** – Ideal for scientific glassware applications in analytical environments.

Upgrade Your Laboratory Workflow Today

Enhance laboratory efficiency with high-performance Receiver Adapters Plain Bend. Designed for precision fluid handling, leak-proof seals, and easy integration into your existing laboratory equipment.
