(ISO,CE,WHO,GMP,FDA 17025:2017 Certified)

Item Name : Flasks Iodine

Item Code : 072.2008.01

Item Description :

Flasks Iodine – Borosilicate Laboratory Glassware for Iodine Value Determination

Flasks Iodine are precision-engineered laboratory glassware designed for efficient iodine value determination in chemical and food analysis. Manufactured from high-quality borosilicate glass, these flasks ensure durability, thermal stability, and chemical resistance for laboratory applications.

Optimized Iodine Analysis with Laboratory Iodine Flasks

- Borosilicate glass construction provides superior thermal resistance and chemical durability.
- Conical shape enhances uniform mixing and controlled iodine reaction processes.
- Interchangeable stopper ensures secure sealing for precise measurements.
- DIN 12383 compliance guarantees compatibility with laboratory setups.

Benefits of Using Iodine Flasks in Laboratories

These flasks enhance laboratory efficiency by providing a stable environment for iodine value determination and chemical analysis. Their conical structure promotes uniform mixing, reducing processing time and improving accuracy.

Scientific & Industrial Applications of Iodine Laboratory Flasks

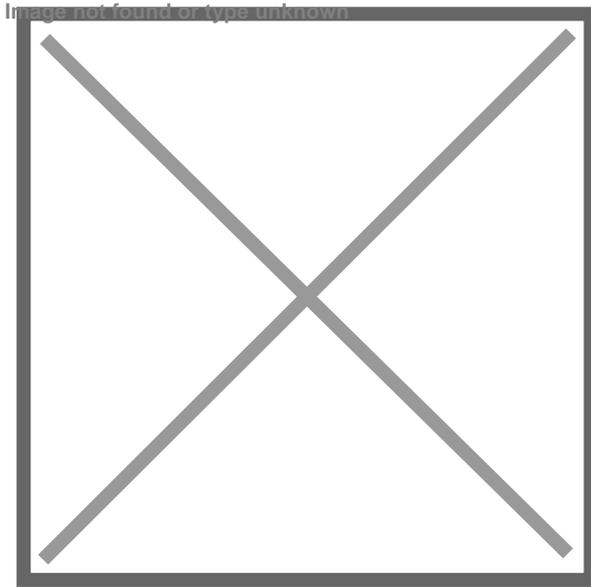

- Used in chemical and pharmaceutical research for iodine value determination.
- Applied in food and agricultural laboratories for fat and oil analysis.
- Integrated into industrial and scientific glassware for efficient sample processing.

Available Sizes for Iodine Flasks

These flasks are available in multiple capacities, including 250ml, 500ml, and 1000ml, with various joint sizes for laboratory compatibility.

Order Your Iodine Laboratory Flask Today!

Enhance your laboratory workflow with Flasks Iodine, designed for controlled iodine value determination and secure chemical processing. Contact us now to request a quote or place an order for your required sizes.
